Support for resolutions up to 4K Ultra HD 60Hz ensures the optimum image quality, perfect for high graphical content in gaming setups, video editing or dual system control workstations. The audio output port on the main unit also allow users to connect headphones or speaker to add immersive 2CH audio and a microphone, while additional USB peripherals can be integrated with a USB hub.

The KVM switch features multiple switching options including a push button control (with 1.5m cable), hotkey and software switching to provide simple, reliable control for the user, great for both professional and first time users.
